

Diamond grinder RO-125

Article 19.14780

The Diamond grinder RO-125

For grinding uneven surfaces of concrete and screed.
 For removing plaster, rough frameworks, paintings, coatings, lacquer and thin adhesive films. For grinding tiles.
 Ideal for working close to walls, in edges and on stairs.
 Engine with power reserve, dust protected with long service life.
 Vacuum system included to connect to industrial vacuum cleaners.

Advantages:

- **Tiltable front cap**
thereby it can be worked till the edge area
- **With effective vacuum system**
with brush which closes shortly on the ground
- **With height adjustable exhaust hood**
for different diamond discs
- **The exhaust hood can be turned infinitely at 90 degrees**
to grind even more comfortable along the wall
- **Ergonomical motor**
for effortlessly working, suitable for right- and left hander
- **With speed regulation from 3400 - 8000 rpm**
for different grinding discs
- **Dust-protected electric components and overload protection**
for a long service life

Technical specifications:

Working power:	1530 Watt
Rotation / rpm:	3400 - 8000
Disc Ø:	125 mm
Weight:	4,7 kg

Exhaust hood turned at 90 degrees to grind even more comfortable along the wall! The front cap is fixed with an integrated magnet.

Front cap is open for grinding till the edge area and in corners. By the construction form there is no space lost!

Speed regulation from 3400 - 8000 rpm for different grinding discs.

Spiral diamond disc with bigger diamond surface and special segment form for high area efficiency.
