

# ROLL Single Disc Machines

## Single disc machine RO-3000

19.16150

Application: designed for heavy duty applications, when you need a machine with high area efficiency and for permanent use, suitable for all ROLL special discs.

### Technical specifications:

Working power: 3000W  
Rotation: 120 - 280 rpm  
Weight: 63,5kg  
Working width: 400mm

Pre-installed for ROLL vacuum system

Recommended use with current limiter 19.14925.

## Single disc machine RO-2200

19.16165

Application: universal machine, when you need a machine with high area efficiency and for permanent use, for all sub-floor works with all ROLL special discs.

### Technical specifications:

Working power: 2200W  
Rotation: 195 rpm  
Weight: 48,0kg  
Working width: 400mm

Pre-installed for ROLL vacuum system

## Single disc machine RO-1800

19.16100

Application: universal machine for all sub-floor works with all ROLL special discs, as well as for cleaning and maintenance.

### Technical specifications:

Working power: 1800W  
Rotation: 150 rpm  
Weight: 40,0kg  
Working width: 400mm

Pre-installed for ROLL vacuum system
