

Vacuum system for ROLL Single Disc Machines

ROLL vacuum system

19.14210

Universal vacuum system, suitable for all Roll-machines for absolutely dust-free work! Keeps the air 100% dust free.

The vacuum system is mounted to the preinstalled machine; the suction hose with adapter is connected to the industrial vacuum cleaner f.ex. 19.15055.

All machines (Power, Giant, Finish, RO-3000V, RO-3000, RO-1800) are already preinstalled to connect this system. Also suitable for previous models of single disc machines – upon request.

Recommendation! We recommend keeping the Vacuum System always mounted!

Holder "Smart"

54.00155

To fix vacuum tube and wrench 12mm at the pole.

Suction hose

With tee branch and bushing to connect to the ROLL dust separator and vacuum cleaner

Connecting pieces

Two connecting pieces to connect the suction hose

Carrying handle

Integrated carrying handle for easy carrying of the machine

Rubber ring

To avoid damage when working along the wall

Metal ring with strip

The movable inner metal ring closes, even on uneven surfaces flush on the ground

ROLL dust separator

19.15030

Maximize the efficiency of your industrial vacuum cleaner!

The ROLL dust separator captures up to 99% of the dust before it reaches your vacuum cleaner, no filter clogging and no loss of suction. Thus, the durability of the filter and the vacuum cleaner is substantially increased. Easy to use, effective in the result.

- + No loss of suction
- + No clogging of the filter
- + Easy to empty
- + with high quality castors including stop-fix brake

Delivered with cyclone, 60l steel tank, wheeled base, connectors and hose.

Steel tank 60l

80.10010

Closed with a lid for replacement with a larger volume of dust.
